

Signstr8™ signpost

- Prevents signs being rotated - no more site visits to straighten twisted signs!
- Accepts standard clips, base plates and external caps
- Available as galvanised (to ISO 1461), PVC coated (grey or black) or painted
- Precision rolled to EN 10305-3
- Designed to BS EN 12899
- 76mm dia x 30mm flat
- Patent pending
- Registered design - 001840703
- **Signstr8™** is 'deemed to comply' with relevant passive safety standards, as the moment capacity is significantly lower than that of a standard 89mm x 3.2mm S355 grade steel post.

NOW AVAILABLE IN ALUMINIUM

Technical

Bending capacity	M_u	: 2.60 kNm
Bending stiffness	EI	: 88.3 kNm ²
Torsional capacity	T_u	: 2.89 kNm
Torsion stiffness	GI_t	: 68.7 kNm ²
