

Lattix 4420

Complete mast

Top cover

Aluminum plate with bolts and washers

Base plate: Steel, Weight with bolts:

Dimension	: 200x200mm
Weight	: 7.6 kg/m
Bending capacity	: 37.0 kNm
Torsional capacity	: 2.80 kNm
Shear capacity	: 20.0 kN
Bending Stiffness	: 794 kNm ²
Torsion stiffness	: 1.14 kNm/(°/m)

Base plates are supplied bolted to the mast with the bolts tightened to the specified torque. Torque values for base plate to mast bolts are 65Nm but baseplates should not be removed or bolts retightened without consulting with Signpost Solutions.
