

Lattix 4425

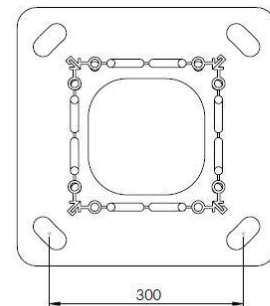

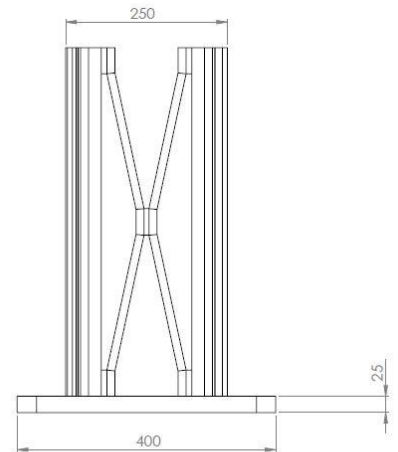

Complete mast

Top cover

Aluminum plate with bolts and washers

Base plate: Steel, Weight with bolts:

Width	: 250x250mm
Weight	: 14.2kg/m
Bending capacity	: 68.25 kNm
Torsional capacity	: 8.0 kNm
Shear capacity	: 34.13 kN
Bending Stiffness	: 2020 kNm ²
Torsion stiffness	: 2.38 kNm/(°/m)

Base plates are supplied bolted to the mast with the bolts tightened to the specified torque. Torque values for base plate to mast bolts are 114Nm but baseplates should not be removed or bolts retightened without consulting with Signpost Solutions.
