

Lattix 4438

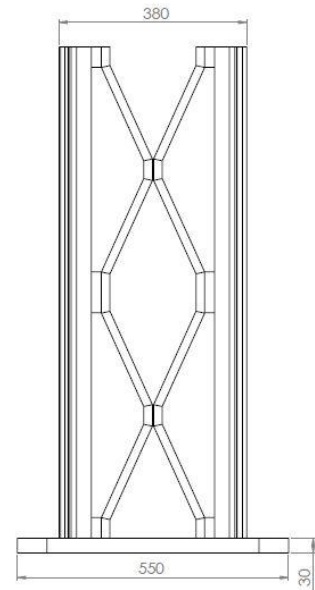

Complete mast

Top cover

Aluminum plate with bolts and washers

Base plate: Steel, Weight with bolts:

Dimension	: 380x380mm
Weight	: 21.8 kg/m
Bending capacity	: 150.0 kNm
Torsional capacity	: 15.0 kNm
Shear capacity	: 65.22 kN
Bending Stiffness	: 6300 kNm ²
Torsion stiffness	: 10.0 kNm(°/m)

Base plates are supplied bolted to the mast with the bolts tightened to the specified torque. Torque values for base plate to mast bolts are 120Nm but baseplates should not be removed or bolts retightened without consulting with Signpost Solutions.
