28 September 2012

Dear Chris

This letter is to document that 3M Diamond Grade DG3 Fluorescent Yellow 4051, when used on the Sign Post Solutions self-righting bollard has an expected performance life of 12 years.

The endurance of 4051 when used in this application is dependent upon the polypropylene “blade” substrate being prepared correctly and primed with 3M Primer 94.

If further information or scenario's are required, please contact me on 01344 858018.

Yours sincerely,

A handwritten signature in black ink that reads 'P. Batchelor'.
